WFH READY

PROFILE

For the past four years I worked at a food factory in Japan, while running a TikTok video-clipping side hustle after hours — cutting vertical video, writing subtitles, and building animated captions.

That grew into building my own website and an AI-powered auto video-clipping app. I'm now based in Cianjur, looking for a long-term WFH role where I can own content production end-to-end — from raw footage to a file that's ready to publish.

I'm used to working independently against targets, communicating over chat, and handling admin work that needs to stay tidy and on time.

EXPERIENCE

Food Production Staff

Aug 2022 — 2026

Fujimoto Rice Delica Co., Ltd. · Japan

Produced bento and Japanese dishes to strict factory quality and schedule standards. Worked shift-based with tight targets for quantity, cleanliness and punctuality — while running video-clipping work on the side outside working hours.

Video Editor & Clipper — TikTok Content

2022 — Now

Independent · Remote

Cut long-form video into short, vertical, publish-ready clips: moment selection, cut timing, subtitles, animated captions and music — a consistent editing style across a high volume of clips.

Developer — Auto Clip (AI auto-clipping app)

Self-directed project

Independent · Remote

Built an app that automatically cuts long video into short, publish-ready clips with subtitles. Designed a modular caption system — text-reveal style, word emphasis, motion and position — for consistent results across many videos. Owned the whole pipeline: input, render, quality control, through to a publish-ready file.

Website & Web App Builder

Self-directed project

Independent · Remote

Built a portfolio website and booking system for a photo studio, landing pages, and a web-based learning app — design through to a live, working website, handled solo.

SKILLS

Editing & Skills

CapCut / DaVinci Resolve	95%
Vertical Video (9:16 Format)	95%
Subtitle & Animated Captions	92%
