LIVE PROJECTS

100%

REMOTE-READY

PROFILE

Self-taught Fullstack Developer with 2+ years building performant, accessible web applications from database to pixel — skills sharpened through self-directed study and real, shipped projects. I specialize in React/Next.js on the front and Node.js/PostgreSQL on the back.

My strength is owning a feature end-to-end — turning fuzzy product ideas into shipped, maintainable software. I care about clean architecture, fast load times, and interfaces that feel effortless.

Lately I focus on AI engineering — integrating LLMs (OpenAI / Claude), building RAG pipelines and AI-powered chat features into real production apps.

EXPERIENCE

Freelance Fullstack Developer

2024 — Now

Self-employed · Remote

Building and shipping production web tools for the Indonesian market — bulk J&T shipping labels, Rupiah invoicing, PPh 21 tax calculator — with Next.js & TypeScript, deployed live on Vercel.

AI Engineering (self-directed)

2024 — Now

Independent

Integrating LLMs (OpenAI / Claude), building RAG pipelines and AI chat features into real web applications.

Freelance Web Developer

2023

Remote · local SMB clients

Company-profile sites, internal dashboards and REST API integrations for small businesses (Next.js, Node, Supabase).

Project — E-Commerce Web App

2023

Personal build

Fullstack online store: product catalog, cart and checkout flow (Next.js + PostgreSQL).

SKILLS

Tech Stack

React / Next.js	95%
TypeScript	92%
AI Engineering (LLM / RAG)	88%
Node.js / Express	90%
PostgreSQL / Prisma	85%
Tailwind / CSS	93%
Docker / CI-CD	80%

SELECTED PROJECTS

Generator Label J&T Massal

Web Tool

Bulk shipping-label generator for Indonesian J&T couriers — paste/upload a CSV of orders and print 100×150mm PDF labels, fully in-browser with no backend.

[Next.js](#) · [TypeScript](#) · [jsPDF](#)

Invoice Generator IDR

Web Tool

Rupiah invoice & receipt builder: automatic terbilang (number-to-words), PPN 11%, A5 print mode and localStorage state — no login, no backend.

[JavaScript](#) · [PDF](#) · [localStorage](#)

Kalkulator PPh 21 TER

Web Tool

Indonesian income-tax calculator (PPh 21 TER, PMK 168/2023) with BPJS deductions, a step-by-step breakdown and a printable A5 payslip — fully client-side.

[HTML](#) · [CSS](#) · [JavaScript](#)

Export Commodity B2B Template

Web Template

SEO-first Astro landing site for Indonesian commodity exporters — JSON-LD product schema, sitemap and OG tags — re-skinnable from a single config file.

[Astro](#) · [TypeScript](#) · [SEO](#)

SMK Job-Ready Pack

Landing Page

Sales landing page for an Indonesian SMK-graduate job-readiness bundle — ATS-safe CV templates, interview Q&A and application-email formats, with a clear who/what/why layout.

[Web](#) · [Landing Page](#) · [SEO](#)

Sakura Anki N3

Web App

Gamified JLPT N3 study app — Japanese grammar and vocabulary flashcards with a spaced-repetition flow, built to make N3 prep feel fun.

[Next.js](#) · [TypeScript](#) · [Tailwind](#)

EDUCATION & TRAINING

Self-Taught Fullstack Development

2022 — Now

Self-directed — online courses, official docs & hands-on projects

AI Engineering — LLMs, RAG & Agents

2024 — Now

Self-directed study

Web Foundations — HTML, CSS & JavaScript

2021 — 2022

Self-directed

WHAT I DO

- Web App Development
- AI / LLM Integration
- RAG & Chatbot Systems
- REST & GraphQL APIs
- Design Systems & UI
- Performance Optimization
- Database Architecture
- Cloud Deployment & DevOps

Interests
